Dear Parents and Guardians,

We have an exciting opportunity for our students to learn computer coding programming. Computer coding skills can help prepare students for future careers in Informational Technology (IT). IT is one of the fastest growing fields with high demand for future careers. We have added a coding class, staffed with coding trained AESD teachers at your school site. Virtual Skylark Coding Classes will be held after school on Mondays, Wednesdays and Fridays from 3:30pm – 4:30pm. **Classes will begin on Wednesday, January 6, 2021. The last class will be Thursday, May 27, 2021.** A schedule of classes will be provided by Ms. Thorup, the coding teacher. Your child is encouraged to attend all coding classes to support his/her progressive development of coding skills.

AESD teachers provide the coding class instruction. The coding classes are offered after school. Students not currently enrolled in the after school program are asked to complete an application for the after school program at www.aya.llc. Since your child is signing up for the after school program to attend the coding class, your child is welcome, but not required to participate in the other classes offered during the afterschool program. Students currently enrolled in the afterschool program only need to submit the coding class interest application located at the bottom of this page.

To apply for the Skylark computer coding class, please email the completed interest application to anne_thorup@aesd.net.

Thank you,

Mrs. Adriana Pantoja
